

enterprise: leverage IP convergence

Barbara Dalibard
senior executive VP,
Orange Business services

IP convergence tends to blur frontiers

* CCA : Communications Critical Applications

network related services market is a fragmented market offering growth opportunities

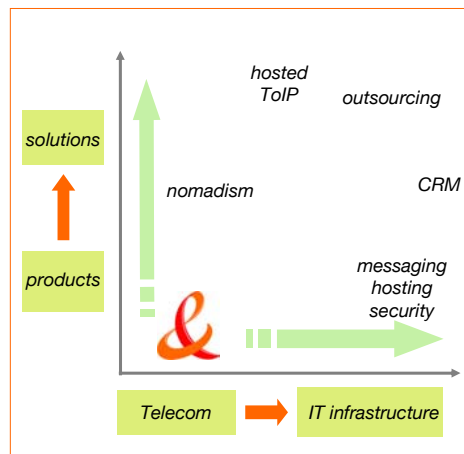

* +7/10% excluding data centers; +4% including data centers

³ source: Mc Kinsey studies, Booz Allen, PAC

in 2004, we said we would develop convergent communication services and enter the network related services arena

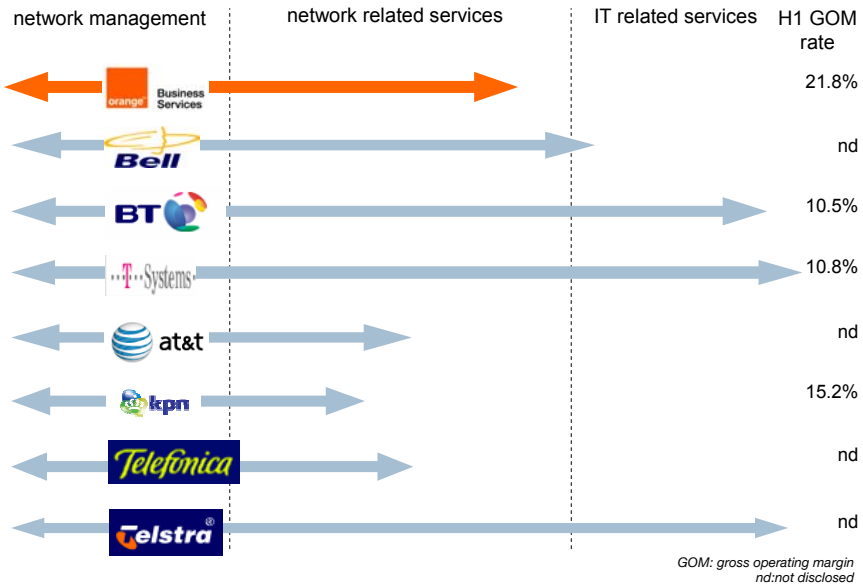

new technologies enable a better integration

a real business transformation

which is one of our difference versus competition

5

we want to be a communication services integrator

IP VPN world leadership, global presence, outstanding customer experience and end-user proximity are our key differentiators

6

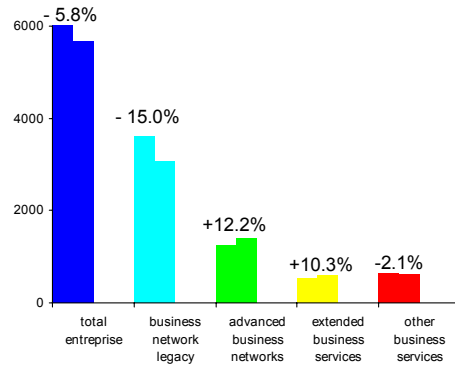

where do we stand in terms of revenues ?

FY 2005 entreprise revenue :
7,785 million euros

- business network legacy
- advanced business networks
- extended business services
- other business services

9 months entreprise revenue,
2006/2005 evolution

in million euros, on a comparable basis

7

networks - current situation

voice market

- traffic market share decline stabilized
- access volumes slightly declining (LP accesses:-1.5% yoy 9M06)
- potential impacts: SDSL adoption, regulation (F-to-M rates)

data: migration
to IP VPN
under
completion

- the world's largest IP VPN reaching 220 countries
- 10,000 MPLS IP VPN customers, representing more than 240,000 customer accesses (vs 116,000 for ATT)

volume growth
1Q 2004-3Q 2006

IP VPN +400%

X25 -60%

data: impact of
migration to
DSL

support of managed networks in France

80% DSL

20% LL

8

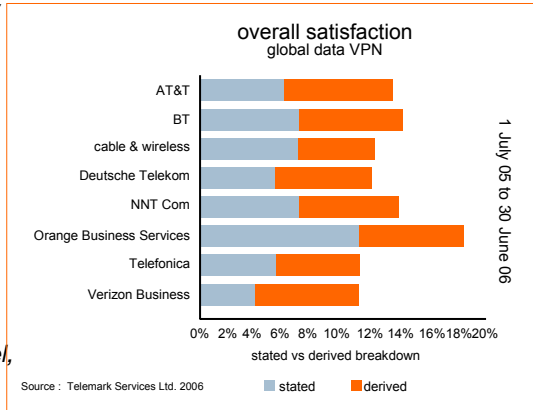

networks - action plan

- *keep our customer through an outstanding customer experience*
 - highest overall satisfaction index
 - highest satisfaction index for data VPN

- *take them along the IP transformation journey*
 - through professional services
 - with robust solutions

- *reduce costs*
 - lean management
 - six sigma
 - offshoring

- *extend scope*
 - Eg. Grand Circle travel, Renault-Nissan

9

IP transformation - current situation

IP solutions

- a full portfolio of offers: IP Telephony and IP contact center solutions
- 6,000 sites and 200,000 IP phones
- 9M06 IP VPN revenues growth : +13% yoy

very broadband access

- *start with France and extend in Europe*
 - *CRM services*
 - *communications critical applications*
- *successfully integrate the acquired companies*
- *develop all service company capabilities*
 - *skills development, Professionalization path, HR tools,*
 - *risk management, follow-up by project*

16

this positioning leads to a dual mode business model

- | | | |
|------------------------------------|---|---|
| ▪ operator model | & | services model |
| ▪ <i>standardized products</i> | & | <i>customized offerings</i> |
| ▪ <i>physical assets</i> | & | <i>intellectual assets</i> |
| ▪ <i>CAPEX intensive</i> | & | <i>labor intensive</i> |
| ▪ <i>technological focus</i> | & | <i>business focus</i> |
| ▪ <i>product margin (a priori)</i> | & | <i>project margin (on going effort)</i> |

level of gross

operating margin

18%- 25%

5%-15%

revenue trend

17

actions to adapt our cost structure

- *review our selling model*
- *decrease of SG&A*
- *lean management everywhere*
- *operational process optimization*
- *access cost and capex optimization*

18

Our ambition

be the leading global communication
services integrator delivering the best
customer experience
